THIS MEANS WAR!

The strategy building game for people who like to blow things up!

You've survived the devastating fallout of **Snark Hunter**, the hideously addictive computer game that nearly eliminated mankind. Now, you flourish in the debris. The year is 12 AG (after game). Earth's cities are yours to reclaim, rebuild...**and defend.**

Your enemies: A few half-crazy, half-brilliant megalomaniacs who survived the apocalypse.

Mondo Khan: The ruthless survivalist.

Napoliennne: A female reincarnation of the feared Frenchman. **Crocodile**

Ghandi: The cruel, cynical cult leader.

And these are just a few.

So, if you like to create complex cities and futuristic military states as much as you like to **annihilate** them, you're sure to have a blast with **This Means War!**

• **Build your empire on the ashes of a post-apocalyptic world.** Create your own military industrial complex. Then, take up arms to smash the strongholds of all who stand in your way! Includes 40 territories to conquer, each with their own unique challenges.

• **Construct the ultimate killing machines.**

Begin with a militia of war-torn jeeps and ragged soldiers. Slowly build up your arsenal. Manufacture fighter planes and futuristic hover tanks. Draft a ruthless army of mercenaries – ready at your command.

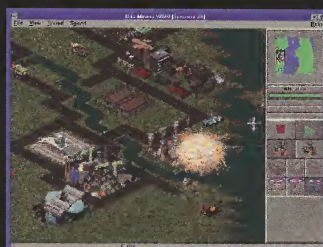

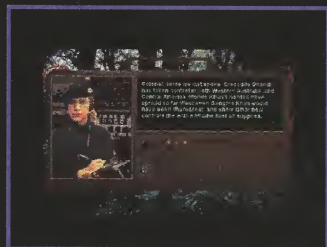

• **Establish your own military academy.**

Behind barracks walls, you can train power-hungry officers and sadistic specialists to execute your master vision for victory over the entire world!

• **Fast action. Easy interface.** Because real commanders don't take turns, neither do you! Real-time action makes gameplay even more authentic and challenging. And, user-friendly Windows® interface makes it simple to get right into the heat of combat.

• **Compelling Musical Score.** Listen to original music composed by The Fat Man™, or insert any audio CD to provide your own soundtrack.

IT'S YOU
VS.
THE WORLD.
OR AT LEAST
WHAT'S LEFT
OF IT.

IBM PC 486 DX 66 or higher, Pentium and Most Compatibles
